These Initial Teacher Education course manuals were developed by a team consisting of members from Colleges of Education and four universities namely the University of Ghana, Kwame Nkrumah University of Science and Technology, University of Education, Winneba, and University for Development Studies. This team was originally constituted by the National Council for Tertiary Education (now the Ghana Tertiary Education Commission) in 2019 to support the delivery of the new B.Ed. curriculum with assistance from T-TEL and UK Aid. The revision, finalization and printing of these manuals took place in 2021 with support from T-TEL and Mastercard Foundation.

The course manuals have been produced for use as general guides for the delivery of the new four-year B.Ed. curriculum in Colleges of Education in collaboration with their affiliated universities. They are designed to support student teachers, tutors, and lecturers in delivering a complete B.Ed. course for training student teachers which meets the requirements of the National Teachers’ Standards, enabling them to teach effectively in basic schools.

The first section of the manuals is focused on the course information and vision for the B.Ed. curriculum. The second section presents the course details, goal for the subject or learning area, course description, key contextual factors as well as core and transferable skills and cross-cutting issues, including equity and inclusion. The third section is a list of course learning outcomes and their related learning indicators. The fourth section presents the course content which is broken down into units for each week, the topic and sub-strands and their related teaching and learning activities to achieve the learning outcomes and the teaching and learning strategies. This is followed by course assessment components in section five. Each manual contains a list of required reading and references as well as teaching and learning resources. The final section presents course related professional development for tutors and lecturers to be able to use each section of the manual.

Field instructions to guide Supported Teaching in School are integrated into the course manuals to provide the student teacher with guidance in developing teaching throughout the entire period of study to be able to meet the requirements of the National Teachers’ Standards (NTS) and the National Teacher Education Curriculum Framework (NTECF). To ensure maximum benefit the course manuals should be used in addition to other resources such as the NTS, NTCEF, National Teacher Education & Assessment Policy and the National Teacher Education Gender Equality and Social Inclusion (GESI) Strategy and Action Plan.. This will help to ensure that student teachers’ learning is integrated within the wider teacher education policy framework.

Professor Mohammed Salifu Director General, Ghana Tertiary Education Commission
ACKNOWLEDGEMENTS

The course manuals were developed through the collaborative efforts of a team of individuals from Colleges of Education, University of Ghana, Kwame Nkrumah University of Science and Technology, University of Education, Winneba, and University for Development Studies. They were produced in association with the Ghana Tertiary Education Commission of the Ministry of Education, Ghana.

A participatory team approach was used to produce this set of resources for tutors/lecturers, mentors, and student teachers. We are grateful to the specialists who contributed their knowledge and expertise.

Special thanks to Professor Jophus Anamuah-Mensah - T-TEL Key Advisor, Dr. Eric Daniel Ananga - T-TEL Key Advisor for Curriculum reform and Beatrice Noble-Rogers who provided key editorial, review and content input and facilitated the process of drafting and finalising the course manual.

Patricia Appiah-Boateng and Gameli Samuel Hahomene, served as typesetting and formatting coordinators and designed and produced the illustrations, tables, and other graphics which appear in the pages. They spent time and effort designing and redesigning the graphic layout and producing the camera-ready copy resulting in a set of materials that are easy to use, read, and reference.

Thanks also goes to all T-Tel staff members who worked to support production of these course manuals, particularly Beryl Opong-Agyei and Gideon Okai. Their frankness and co-operative attitude complimented the team approach used to produce this manual.

We are indebted to the Ministry of Education and the Ghana Tertiary Education Commission (GTEC) for the general support and specific helpful advice provided during production of the course manuals. Recognition and thanks must go to Chief Technical Advisor for T-TEL and Policy Advisor to the National Education Reform Secretariat, Akwasi Addae-Boahene, Prof. Mohammed Salifu, the Director General of GTEC and Mr. Jerry Sarfo the coordinator for the colleges of education, who in diverse ways supported during the course manual writing workshops.

In addition to all the staff who participated visibly in the development of these materials we would like to acknowledge all those people from the many colleges of education and universities in which we have worked who have, directly or indirectly, shared their views on the curriculum with us.

INTRODUCTION TO COURSE MANUALS

Welcome to this B.Ed. Course manual.

Following the accreditation of the B.Ed. by the national accreditation Board with its recognition as a world class teacher education curriculum, the decision was taken to support effective implementation through the development of course manuals. the course manuals provide tutors and lecturers with the materials necessary to support teaching each of the B.Ed. courses. The manuals adhere directly to, and emphasise, the principles and standards set out in the NTS, NTECF and in the B.Ed. and will help ensure operationalising the Government’s teacher education reform Policy.

The manuals serve the following purposes:

- they are the key educational agreements between the training institution and the student teachers. In this way student teachers know what the expectations are for them and for the training they will receive.
- they lay out the course outcomes, content, strategies, and assessment, thereby providing direction to and consistency in training and B.Ed. implementation among tutors across the country.
- they are explicit documents that provide other institutions with information on which to base transfer/articulation decisions.

Specifically, they also:

- support coherent lesson planning and teaching which will enable student teachers to achieve the NTS and become good teachers who ensure all pupils’ learning whilst offering tutors the flexibility for adaptation for local needs and contexts.
- Provide a lesson by lesson overview of the course, building on and developing the material in the course specifications.
- Inform tutors, student teachers and others working with student teachers about:
  1. What is to be taught and why.
  2. how it can be taught.
  3. how it should be assessed.
- Provide opportunities for student teachers to develop and apply knowledge during supported teaching in school, creating a strong bond between learning in school and in the training institution.
- Reflect the stage of student teacher development, set out in the model for progress across the four years of the B.Ed.
- Can be used as self-study tools by student teachers.
- Ensure that all information necessary to inform teacher training is in one place (serves as reference document).
- The manuals are the basis of the codes and university professional development sessions to ensure Principals, tutors, lecturers and heads of department are fully familiar with the details of: courses, outcomes, content, approaches, assessments and lessons.
Who are course manuals for:

- College of Education Tutors
- Teacher Education University Lecturers
- Student Teachers
- Mentors and Lead Mentors
- All Those with An Interested In Teacher Education.
USING THIS MANUAL

Writers of the manuals engaged widely with colleagues in each subject area at each stage of development. Besides, writers envisaged themselves in varied contexts as they wrote, to suggest methodologies and strategies for teaching the strands which would ensure student teachers are enabled to achieve the learning outcomes. In view of our commitment to creativity, problem solving, collaboration and to lifelong learning, we expect that individual tutors will “own” their manuals and become user-developers. Lessons in the manuals will be strands for weekly Pd meetings where tutors/lecturers will situate the lessons in the contexts of their colleges and their student teachers, to maximize the benefits.

It is also expected that tutors will model the best pedagogic practices for student teachers. Key among such practices is the communication of the importance of having a personal teaching philosophy. We expect that tutors and lecturers will explicitly communicate their personal teaching philosophies to their student teachers during the first meeting of every course. In preparation for this, we suggest you set out your personal teaching philosophy and how it will be demonstrated in your teaching using, or adapting, the sample sentence introductions below.

My teaching philosophy is …………………………………………………………………………………………………………………………………

In view of this philosophy, I will facilitate this course by/through ………………………………………………………………………...

**Title of Lesson** | Sunlight | **Lesson Duration** | 3 Hours

**Lesson description**

In this lesson, the Tutor will assist the student teacher to review previous knowledge on sunlight as source of energy and its importance to plant, aspects of which were studied in senior high school. The lesson will then deepen their conceptual understanding of uses and importance of sunlight to plants. They will be exposed to teaching strategies and material so that they will effectively handle similar topics in their future science classrooms. This first lesson introduces student teachers to the course learning outcomes and the three assessment components of the course.

**Previous student teacher knowledge, prior learning (assumed)**

Student teachers have studied solar energy, sunlight and its role in manufacture of food by plants

**Possible barriers to learning in the lesson**

Student teacher might still have misconceptions about origin of the sun and a naïve belief that light is not a form of energy.

**Lesson Delivery – chosen to support students in achieving the outcomes**

**Lesson Delivery – main mode of delivery chosen to support student teachers in achieving the learning outcomes.**

Face-to-face: Discussion, Talk for learning approaches with student teacher presentations, multimedia presentations (video clip clips, animation, and pictures on PowerPoint). NTS 3j, pg. 14

Practical activity: student teachers work in mixed ability and gender based group experimentation and presentation of reports

- **Purpose for the lesson, what you want the students to achieve, serves as basis for the learning outcomes.** An expanded version of the description.
- **Write in full aspects of the NTS addressed**
  - Deepen student teachers’ basic concepts on the uses and importance of sunlight to plants
  - Correct student teachers’ misconceptions about the origin of the sun and incorrect ideas about light not being a form of energy
  - Build the necessary support going forward on SEN and Gender issue
  - The student teacher will develop skills of experimentation.
  - Provide student teachers with the requisite knowledge and skills to be able to teach the topic use of sunlight and importance of sunlight to plants.

The realization of these intentions can be found in the following NTS:

2c: Has secure content knowledge, pedagogical knowledge and pedagogical content knowledge for the school and grade they teach in.

3f: Pays attention to all learners, especially girls and students with Special Educational Needs, ensuring their progress.

3j: Explains concepts clearly using examples familiar to students.

- **Learning Outcome for the lesson, picked and developed from the course specification**
- **Learning indicators for each learning outcome**

**Lesson Delivery – main mode of delivery chosen to support student teachers in achieving the learning outcomes.**  
Face-to-Face: Discussion, Same ability, mixed ability and gender based group works.  
Independent Study: Nature walk  
e-learning Opportunities: OERs and Video presentations

- **Purpose for the lesson, what you want the students to achieve, serves as basis for the learning outcomes. An expanded version of the description.**  
  Understanding the use of games and rhymes to make early grade learning meaningful  
  NTS:  
  2a) Demonstrates familiarity with the education system and key policies guiding it.  
  2b) Has comprehensive knowledge of the official school curriculum, including learning outcomes.  
  2c) Has secure content knowledge, pedagogical knowledge and pedagogical content knowledge for the school and grade they teach in

- **Learning Outcome for the lesson, picked and developed from the course specification**  
  Learning Outcomes
  Learning Indicators
  Identify which cross – cutting issues, core and transferable skills, inclusivity. Equity and addressing diversity. How will these be addressed or developed

- **Learning indicators for each learning outcome**  
  - Develop an understanding of the ideas early grade learners may have about food around them  
  - Demonstrate significant ability to design and engage in practical activities and other alternative interactive assessment practices (NTS, 14, 19 & 23)
  - Design concept maps on ideas early grade learners may have about food  
  - Present a chart of activities for early grade teaching on the concept foods.
  - Demonstrate adequate knowledge and understanding that food gives energy, growth and protection to the human body. (NTS, 2c, Pg. 13)
  - Provide a reflection report and answer questions on the topic
  - Equity and Reflection is developed from reflective activities

Title of Lesson | Further strategies on learning to teach about Food | Lesson Duration | 3 Hours

Lesson description
In this lesson, the Tutor will assist the student teacher to review previous knowledge on food for growth, aspects of which were studied in senior high school. The lesson will then deepen their conceptual understanding of how nutrients from the food for growth are used to promote growth and maintain the human body from lesson 2. They will be exposed to teaching strategies and material so that they will effectively handle similar topics in their future science classrooms. The student teacher will also appreciate the local food substances including eggs, meat, legumes, and milk which support growth.

Previous student teacher knowledge, prior learning (assumed)
Student teachers have studied food substances which support growth and welfare substances that are needed in small quantities but protect the human body against infections at the senior high school level and from lesson 2.

Possible barriers to learning in the lesson
Student teacher might still have some unscientific cultural beliefs about children being fed on protein-rich food substances such as eggs and taboos involving plant and animal species which otherwise could provide good sources of protein and vitamins.

Lesson Delivery – chosen to support students in achieving the outcomes

<table>

Lesson Delivery – main mode of delivery chosen to support student teachers in achieving the learning outcomes
Face-to-face: Discussion, Talk for learning approaches with student-teacher presentations, problem-based teaching, multimedia presentations. Practical activity: student teachers work in groups and present chats checklists, and report on food and how to teach it

- Purpose for the lesson, what you want the students to achieve, serves as basis for the learning outcomes. An expanded version of the description.
- Write in full aspects of the NTS addressed
- Deepen student teachers’ level of understanding of concepts: proteins and food nutrients
- Correct student teachers’ misconceptions and incorrect ideas about consumption of some protein-rich food substances
- Build the necessary support going forward on SEN and Gender issue
- The student teacher will develop skills of data collection and presentation on local food substances that promote growth and protection when consumed.
- The lesson should help the student teacher develop a chart of local food substances with their corresponding nutrients
- Provide student teachers with the requisite knowledge and skills to be able to teach the topic ‘Further strategies on learning to teach about food’

The realization of these intentions can be found in the following NTS:
3f: Pays attention to all learners, especially girls and students with Special Educational Needs, ensuring their progress.
3j: Assessment as Learning: Student teachers present report to on how to use diverse strategies to demonstrate their knowledge and conceptual understanding of how the human body uses the protein consumed for growth.
3g: Employs instructional strategies appropriate for mixed ability, multilingual and multi-age classes
3k: Integrates a variety of assessment modes into teaching to support learning

- Learning Outcome for the lesson, picked and developed from the course specification
- Learning indicators for each learning outcome

<table>

In this lesson, the Tutor and student teacher discuss the common electronic gadgets used in homes. For example, the cell phone, the wireless and television. This lesson will enable student teachers to appreciate the importance of science and its inventions that are classified as wonders of the world.

Student teachers have been using cell phone, wireless, TV and other electronic gadgets and home or their previous schools.

Student teachers have fear of using some of the electronic appliances and may not know that some appliances at home are of electronics. Student teacher might not have seen personal computer before or have not being using cell phone.

Discussion: although basic Electronics Components comprises of various types of components, which are classified into two types: active components like transistors, diodes, IC's; and passive components like capacitors, resistors, inductors, etc. student teacher explain part play by these components and how simply life become with the use of electronic gadgets or appliance. Tutor and student teacher interactions on the operation of computers/cell phone. Mixed group activities to press keys on the computer or cell phone.

- Mention the various types of electronic components, such as, resistors, capacitors, transistors, etc., that make the cell phone or TV work.
- Mention the various types of electronic gadgets or appliances in the homes and schools.
- To enable female student teachers touch and manipulate their cell phones, digital watch and or the computer.
- Encourage proper record keeping of most of the appliances they come into contact. For example, Microwave oven, air conditioner, Stacked washing machine and clothes dryer, Gas fireplace, Refrigerators, Vacuum cleaner, Electric water heater tank, Small twin window fan, Cell phone, digital watch, etc.

National Teachers' Standards: The teacher
2c) Has secure content knowledge, pedagogical knowledge and pedagogical content knowledge for the school and grade they teach in.
3d) Manages behaviour and learning with small and large classes.
3e) Employs a variety of instructional strategies that encourages student participation and critical thinking.
3f) Pays attention to all learners, especially girls and students with Special Educational Needs, ensuring their progress.
3g) Employs instructional strategies appropriate for mixed ability, multilingual and multi-age classes.
**Learning Outcome for the lesson, picked and developed from the course specification**

**Learning indicators for each learning outcome**

| Simple Electronics B1.4.2.2.1 | i. Simple Electronic Components | 90 minutes | Face-to-face: Tutor introduces the lesson by asking student teachers to mention some examples of electronic gadgets they have used/seen before.  
ii. Tutor groups student teachers and provide pictures and/or videos of simple electronic components and ask students to identify them for their uses.  
Student teachers, working in groups sort electronic components according to their use |
| | | | |
| Simple Electronic Gadgets | | 90 minutes | Face-to-face: Tutor provides pictures of simple electronic gadgets/appliances and ask students to identify the use and the components within and make a concept map for the observation.  
i. (a) Open-ended questions to elicit misconceptions/incorrect ideas about electronic appliances.  
Practical Activity: Student Teachers form groups of mixed abilities to perform (Females as leads)  
Practical Activity: Presentation  
Each student reviews their thought about the electronic gadgets they brought from home which they presented to the class.  
- Student arrange the appliances in categories they again think necessary.  
- Student teachers draw concept maps of the appliances. |
(b) Practical activities that require the students take a tour on the school to identify some electronic appliance use in the school.

iii. Concept mapping of electronic gadgets/appliances.

- Face-to-face: Tutor describes the process of designing activities for teaching and the process of inquiry learning to student teachers.
- Face-to-face: Teacher allows student teachers to make group power point presentation on how to teach Basic electronics at the basic level of education.

Which cross cutting issues will be addressed or developed and how

Equity and SEN: through setting ground rules to protect vulnerable student teachers and establishing an interactive and inclusive classroom atmosphere. Through round table they should discuss various electronic components as far as they can, student teachers’ accuracy, honesty and carefulness will be addressed.

Lesson assessments – evaluation of learning: of, for and as learning within the lesson

- Assessment of learning: Student teachers list the electronic gadgets/appliances and their corresponding uses
  NTS2c: Has secure content knowledge, pedagogical knowledge and pedagogical content knowledge for the school and grade they teach in
  NTS 3d: Manages behaviour and learning with small and large classes teaching and learning
- Assessment as learning: Student teachers do group power point presentations on how to simulate some functions of electronic appliances for differentiated teaching
  NTS 3e: Employs a variety of instructional strategies that encourages student participation and critical thinking
  NTS 3f: Pays attention to all learners, especially girls and students with Special Educational Needs, ensuring their progress.
  NTS 3g: Employs instructional strategies appropriate for mixed ability, multilingual and multi-age classes.
- Assessment for learning: Drawing of concept maps on electronic gadgets/appliances to assess what student teachers have learnt at the end of the lesson
  NTS 2c: Has secure content knowledge, pedagogical knowledge and pedagogical content knowledge for the school and grade they teach in

Teaching Learning Resources

Electronic components brought by students and/or bought from the market. E.g., resistors, capacitors, transistors, potentiometers, etc.

Required Text (core)

Additional Reading List

| CPD Requirement | i. Extra reading to understand the basic principles by which these electronic components operate.  
ii. Training in how to report findings from research (such as classroom studies) honestly and objectively |

• Assessment for learning: Design diagrams of electronic gadgets like toys to assess what student teachers have learnt at the end of the lesson
  NTS 2c: Has secure content knowledge, pedagogical knowledge and pedagogical content knowledge for the school and grade they teach in |

| Teaching Learning Resources | Electronic toys brought by students and/or bought from the market. E.g., toy cars, phones, babies, etc. |
| CPD Requirement | • Training teachers to understand the design principles and operations of some electronic toys. |
# LESSON 6

**Title of Lesson**
Course Review I and STS Seminar

**Lesson Description**
This lesson is a review and audit of the lessons for the first half of the semester as well as review and discussion of lessons learned, reflection on observations made during the supported teaching in schools (STS).

**Previous student teacher knowledge, prior learning (assumed)**
Lessons learnt from lesson 1 through lesson 5 in all learning approaches and observations/experiences during STS.

**Possible barriers to learning in the lesson**
Misconception to some concepts not adequately dealt with. Lessons not appropriately understood by student teachers.

<table>

</tbody>
</table>

## Lesson Delivery – main mode of delivery chosen to support student teachers in achieving the learning outcomes.

- Face-to-face: Discussions, demonstrations and observations
- Practical Activities: Individual demonstrations of handwashing, bathing and cleaning teeth
- Independent Study: Reflections
- e-learning Opportunities: Simulations, video presentations

## Purpose for the lesson, what you want the students to achieve, serves as basis for the learning outcomes. An expanded version of the description.

- Get the conceptual understanding of personal hygiene in terms of handwashing, cleaning the teeth and bathing the body.
- Demonstrate proper ways of handwashing, cleaning the teeth and bathing the body
- Discard the common misconceptions that student-teachers have about personal hygiene
- Designing activities to teach personal hygiene

### NTS, The teacher

1a) Improves personal and professional development through lifelong learning and continuous Professional Development.  
2c) Has secure content knowledge, pedagogical knowledge and pedagogical content knowledge for the school and grade they teach in. 
3d) Manages behaviour and learning with small and large classes.  
3e) Employs a variety of instructional strategies that encourages student participation and critical thinking.
3f) Pays attention to all learners, especially girls and students with Special Educational Needs, ensuring their progress.  
3g) Employs instructional strategies appropriate for mixed ability, multilingual and multi-age classes.

## Learning Outcome for the lesson, picked and developed from the course specification

- Define and explain what is meant by personal hygiene
- Demonstrate understanding and show how to wash hands, clean the teeth and bath the body.

## Learning Indicators

- Define and explain what personal hygiene is.
- Role play to demonstrate proper ways of washing hands, cleaning the teeth and bathing the body (PD Theme 1, pg. 44; PD Theme 4, pg. 112)
- Present charts and models of proper ways of washing hands and cleaning the teeth. (PD Theme 5, pg. 37)

Through discussions and sharing of ideas in class student teachers develop the skills of communication, collaboration and mutual respect while appreciating individual difference and abilities. They also acquire skills in handling devices, develop critical thinking, honesty, accuracy and responsibility through active participation in group work/discussion.
- Erase misconceptions about personal hygiene.
- Designed activities that can be used to teach personal hygiene.

## Title of Lesson
Teaching Simple Machines

## Lesson Duration
3 Hours

## Lesson Description
In this lesson, Tutor discusses simple machines with student-teachers. Usually, student teachers think of machines as those with complicated systems like automobiles, airplanes, computers, and farm machines. This lesson will introduce student teachers to simple machines that we see in our homes, schools, and on the playgrounds and how these machines are important for daily life.

## Previous Student Teacher Knowledge, Prior Learning (assumed)
Student teachers have been using hammer to nail a wood, opener to open bottle-tops, a pair of scissors to cut materials, and incline planes to offload goods from trucks.

## Possible Barriers to Learning in the Lesson
- Student teachers may:
  - Have the misconception that simple machines may also include all the sophisticated systems of machines.
  - Not have the skills in teaching simple machines to the Basic School learner.

## Lesson Delivery – Chosen to Support Students in Achieving the Outcomes

<table>

<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

## Lesson Delivery – Main Mode of Delivery Chosen to Support Student Teachers in Achieving the Learning Outcomes
- Face-to-Face: Discussion, Tutor and student teachers’ interactions on the functions of simple machines
- Practical Activity: Practical manipulation of simple machines
- Independent Study: Inquiry and reflections
- e-Learning Opportunities: Use of internet, simulations, and video presentations

## Purpose for the Lesson, What You Want the Students to Achieve, Serves as Basis for the Learning Outcomes
- Identify some common machines or tools as simple machines
- Make sketches of some simple machines
- Demonstrate the skill and knowledge to teach the subject matter

National Teachers’ Standards: The teacher;
- 2c) Has secured content knowledge, pedagogical knowledge, and pedagogical content knowledge for the school and grade they teach in.
- 3d) Manages behaviour and learning with small and large classes.
- 3e) Employs a variety of instructional strategies that encourages student participation and critical thinking.
- 3f) Pays attention to all learners, especially girls and students with Special Educational Needs, ensuring their progress.
- 3g) Employs instructional strategies appropriate for mixed ability, multilingual, and multi-age classes.

## Learning Outcome for the Lesson, Picked and Developed from the Course Specification
- Demonstrate adequate knowledge and understanding on various simple devices/machines and their corresponding functions (bottle opener, scissors, pincers, crowbar, screwdriver, pliers, hammer, shears, wheelbarrow, spanner and knives). (NTS, 2c)

## Learning Indicators
- Sketches of simple devices/machines and their corresponding functions.

Correct handling of devices, good identification of simple machines, sharing ideas in class, Student teachers develop skills of communication, collaboration, and mutual respect while appreciating individual differences and abilities, and critical thinking and responsibility through careful participation in group work/discussion.

## Lesson description
In this lesson, the Tutor discusses the uses of simple machines with student teachers. Basically, student teachers have read and used some simple machines without necessary knowing that they are simple machines. For instance, student teachers have read about how a ramp helps one to do work and also use a shovel to do work. A ramp is a type of inclined plane, and a shovel is a type of lever. An inclined plane and a lever are both simple machines. Student teachers will get to know that there are six machines on which all other mechanical machines are based (inclined plane, lever, the wheel and axle, pulley, wedge, and screw). This lesson will introduce student teachers to the uses of the six simple machines.

## Previous student teacher knowledge, prior learning (assumed)
Student teachers have studied examples of simple machines in their previous lesson, like bottle opener, scissors, pincers, crowbar, screw driver, pliers, hammer, wheel barrow, spanner and knives.

## Possible barriers to learning in the lesson
- Student teachers may:
  - Have doubt that certain tools are simple machines, like wheel and axle, misconception that simple machines may also include all the sophisticated systems of machines.
  - Not know the uses of some simple machines.
  - Not have the skills in teaching the six types of simple machines and their uses to the Basic School learner.

## Lesson Delivery – chosen to support students in achieving the outcomes

## Lesson Delivery – main mode of delivery chosen to support student teachers in achieving the learning outcomes.
Face-to-Face: Discussion, Tutor and student teachers’ interactions on the functions of simple machines
Practical Activity: Practical manipulation of simple machines
Independent Study: Inquiry and reflections
e-learning opportunities: Use of internet, simulations and video presentations

### Purpose for the lesson, what you want the students to achieve, serves as basis for the learning outcomes. An expanded version of the description.
- Identify some common machines or tools as simple machines
- Acquire the skills of using the six types of simple machines
- Demonstrate the skill and knowledge to teach the six types of simple machines.

National Teachers’ Standards: The teacher
2c) Has secured content knowledge, pedagogical knowledge and pedagogical content knowledge for the school and grade they teach in.
3d) Manages behaviour and learning with small and large classes.
3e) Employs a variety of instructional strategies that encourages student participation and critical thinking.
3f) Pays attention to all learners, especially girls and students with Special Educational Needs, ensuring their progress.
3g) Employs instructional strategies appropriate for mixed ability, multilingual and multi-age classes.

### Learning Outcome for the lesson, picked and developed from the course specification
- Demonstrate adequate knowledge and understanding on various simple devices/machines

### Learning Indicators
- State the functions/uses of the six simple machines.

### Identify which cross – cutting issues, core and transferable skills, inclusivity. Equity and addressing diversity. How will these be addressed or developed
- Correct/ handling and uses of devices, good identification of simple machines, sharing ideas in class, Student
and their corresponding functions (inclined plane, lever, the wheel and axle, pulley, wedge, and screw). (NTS, 2c)

teachers develop skills of communication, collaboration and mutual respect while appreciating individual difference and abilities, critical thinking and responsibility through careful participation in group work/discussion.

**Lesson description**

EGE Science Student-teachers as Resources

In this lesson, the Tutor further discusses the nuances embedded in the Early Grade Science Curriculum and how it could be translated practically. The importance of understanding the way it is sequenced and its role within the training of the early grade child is emphasised. This will enable student-teachers to conceptualise their own roles as teachers in the life of the early grade child in a more holistic manner as it will enable young student-teachers to create inclusive learning environments by providing the necessary adaptable and safe environment for the early grade learner.

**Previous student teacher knowledge, prior learning**

Student teachers have already been introduced to the science curriculum studies course, EGE 211

**Possible barriers to learning in the lesson**

Student teachers may lack knowledge about the features of early grade science.

**Lesson Delivery – chosen to support students in achieving the outcomes**

<table>
<thead>
<tr>
<th>Face-to-face</th>
<th>Practical Activity</th>
<th>Work-Based Learning</th>
<th>Seminar</th>
<th>Independent Study</th>
<th>e-learning opportunities</th>
<th>Practicum</th>
</tr>
</thead>
</table>

**Lesson Delivery – main mode of delivery chosen to support student teachers in achieving the learning outcomes**

Discussion: student teachers make presentations (in mixed ability groups) on what they consider as important variables in early grade science

Seminars:

E-learning opportunities: use of internet, simulations, video and computer demonstrations

**Purpose for the lesson, what you want the students to achieve, serves as basis for the learning outcomes. An expanded version of the description.**

- Accentuate the studentteacher to the essential attitudes and values of professional science teaching such as honesty, carefulness, accuracy and many more.
- Emphasise child study styles taking into consideration cultural and gender issues
- Appreciation of gender responsive and child-adaptive teaching strategies
- Continue to peruse the new Early grade science curriculum and how to interpret the requirements
- Acquire the skills to compile/document academic work and other educational evidence for portfolios
- Acquire skills to evaluate coursework, learning progress and academic achievement

**NTS, The teacher:**

1a) Critically and collectively reflects to improve teaching and learning
2c) Has secure content knowledge, pedagogical knowledge and pedagogical content knowledge for the school and grade they teach in.
3b) Carries out small scale action research to improve practice.
3g) Employs a variety of instructional strategies that encourages student participation and critical thinking.
3e) Employs instructional strategies appropriate for mixed ability, multilingual and multi-age classes.

**Learning Outcome for the lesson, picked and developed from the course specification**

**Learning Indicators**

- Identify which cross-cutting issues, core and transferable skills, inclusivity. Equity and addressing diversity.

**Learning Outcomes**

- Student teachers as resources about diversity (NTS, 2e, Pg. 13)
- Core skills to be acquired: Honesty, carefulness, accuracy and tolerance

Seminar: Presentations of models, cartoons and maps of the concepts  
e-Learning opportunities: Computer simulations and OERs on content and teaching activities for contents. |

- **Purpose for the Lesson,** what you want the students to achieve, serves as basis for the learning outcomes. An expanded version of the description.
- **Write in full aspects of the NTS addressed**

- Ascertain the level of understanding and teaching methods of concepts.
- Test various skills and cross-cutting issues.
- Provide remedial tuition/tutorials where necessary.
- Correct misconceptions and misinformation.
- Build the necessary support going forward on SEN and Gender issue.

  NTS, 1a, Pg. 12; NTS 2c, pg. 13, NTS 3b, 3e & 3g, pg. 14; NTECF pg. 20

  1a) Critically and collectively reflects to improve teaching and learning  
  2c) Has secure content knowledge, pedagogical knowledge and pedagogical content knowledge for the school and grade they teach in.

  3b) Carries out small scale action research to improve practice.

  3e) Employs instructional strategies appropriate for mixed ability, multilingual and multi-age classes.

  3g) Employs a variety of instructional strategies that encourages student participation and critical thinking.

**Learning Outcome for the Lesson,** picked and developed from the course specification.

- **Learning Indicators for Each Learning Outcome**

  - Identify weaknesses and strengths in learning the science lesson for the period under review.
  - Make a list of weaknesses and strengths on poster papers for sharing PD Theme 4, pg. 111
  - Collaborations, Communication and Research through group work and presentation

  - Reflect on lessons learnt so far and state new insights and/or grey areas needing remedies.
  - Provide a reflective report and answer questions on topics learnt so far through demonstrations and illustrations on a given media.
  - Equity and Reflection is developed from reflective activities PD Theme 1. pg. 12-15; pg. 41

  - Correct misconception/misinformation for earlier (lesson 7 – 11) lessons.
  - Present concept maps and/or models linking misconceptions or misinformation to new insights.
  - Creativity and critical thinking are developed in developing models and concept maps.
### Course Overview II

1. Reviewing the understanding and teaching of lessons on Personal Hygiene, Simple Machines, and preparation of Resources for EGE
