Foreword

In Ghana we have made great strides in transforming our teacher education system over the past few years. With each passing year the changes brought about through these reforms are maturing, embedding, and sustaining. Once the first B.Ed. graduates from Colleges of Education enter basic school classrooms from 2022 onwards, I am sure that as a nation, we will truly start to see the benefits of these reforms.

The success of national reforms depends on individual tutors and individual teachers working in classrooms across the country every day. The progress that we want to see will only be brought about through the consistent and regular application of the professional knowledge, professional practice and professional values and attitudes set out in the National Teachers' Standards.

This is where the Tutor Professional Development Handbooks have such an important role to play, and it is very pleasing to see the continued development and use of these handbooks as we enter the 3rd Year of the B.Ed. in Initial Teacher Education.

These Handbooks aim to ensure that tutors in Colleges of Education are reflecting critically on their methods of teaching and learning and supporting each other to implement the B.Ed. in line with the National Teacher Education Curriculum Framework and National Teacher Education Assessment Policy. Assessment is one of the areas where we need to pay particular attention as the teacher education reforms matures and is sustained. The National Teacher Education Assessment Policy sets out the range of formative and summative modes and methods of assessment required to ensure that the B.Ed. is both implemented and assessed as planned. Assessment is a key driver of learner behaviour, and we must all ensure that we are familiar with the National Teacher Education Assessment Policy and applying it consistently to ensure that we eliminate the 'chew, pour, pass and forget' syndrome which has infected our education system. These Handbooks pay particular attention to assessment and are an important tool in ensuring that we are all following national policy guidelines correctly and consistently.

This latest set of Professional Development Handbooks, developed by four mentoring universities (University for Development Studies, University of Education, Winneba, University of Ghana and Kwame Nkrumah University of Science and Technology) and tutors from their affiliated Colleges of Education, are the second set of Professional Development Handbooks to be developed since Transforming Teaching, Education & Learning (T-TEL) became a Ghanaian not-for-profit organisation. I would like to take this opportunity to thank both the Ghana Tertiary Education Commission and Mastercard Foundation for making all this possible.

Critical Note

This PD manual is designed to facilitate PD sessions for all the 20 courses mounted in Year three Semester one in all the four TVET domains, namely, Agriculture, Home Economics, Technical and Visual Art. It is worth noting that the idea that informed amalgamating all the TVET Courses into one PD manual is the common base that has been established in the new B. Ed curriculum. The B.Ed. TVET curriculum has established six (6) key content areas common to all. These include:

Classification	Content
General TVET Knowledge	Terminologies, concepts, theories, historical, philosophical, and sociological foundations, movements, associations and related organizations, policies, misconceptions about TVET
Operating and processing Tools, equipment and machines	Nature (identification), proper uses, care/maintenance of tools, equipment and machines
Skills Training Materials and Resources	Sources, characteristics/properties, uses and health, safety and environment (HSE)
Learning Environments: Workshops, studios, and laboratories	types and uses, management practices, safety rules and practices, HSE including Water, Health and sanitation (WASH) related issues
Operations, processes, procedures, and products	Design and realisation/composition, laying out, manufacturing processes and their related HSE, adherence to specifications (to ensure safety of consumers/clients)
Entrepreneurship	key concepts, principles, relevance, business creation, business ethics and social responsibility

What this means is that the component domains (Agriculture, Home Economics, Technical and Visual Art) understand a common language hence can work together. It is important to note that the TVET version of Agriculture is different from the traditional Agricultural Science. It is vocational Agriculture which is expected to be delivered in the Competency Based Training (CBT) mode like all the others.

In this manual, each domain finds expression in the same questions and processes as it relates to their peculiarities. SLs/HoDs should therefore give reasonable room for each domain to find expression most suitable to their peculiar need and expression. ***SLs/HoDs must draw attention to course combinations as it relates to each domain. Details are provided in the table below.***

Some clarifications have been given as *guidance notes for SL/HoD* in the spaces provided in the template. Some additional teaching technics have also been suggested for tutors' consideration. In addition, some ideas included in Year 2 Semester 2 has been repeated here for the perusal of tutors. They include:

1. Summery of NEAP Assessment (Session 1)
2. How to score practical lessons (session 2)
3. Building of Portfolios (Session 3)
4. How to organize Field Trips (Session 4)

Age Phase:	Name of Subject: TVET (Agriculture, Home Economics, Technical, Visual Arts)
-------------------	---

TVET Courses for Year 3 Semester 1 are as follows

Agriculture

- Scientific Approaches to Solving Agricultural Problems
- Sustainable Agricultural Practices

Home Economics

- Processes and Procedures in Clothing and Textiles
- Processes and Procedures in Food and Nutrition

*Student teachers reading **Agriculture** and **Home Economics**, must select the two courses mounted in their main areas and add the two from the other area to make four (4) courses in all. What this means is that, a Home Economics student will select the two courses mounted by Home Economics and add the two mounted by Agriculture to make up the four. The opposite applies to students reading Agriculture.*

Technical

- Design and Realisation III
- Building Drawing
- Metal and Automotive Technology II
- Wood Technology II
- Construction Technology II
- Electrical Machines

*For Technical, **Building Drawing** and **Design and Realisation III** are the Core courses. Student teachers are to select any other two from the list above.*

Visual Art

Introduction to:

- Basketry
- Pottery & Ceramics
- Leatherworks
- Jewellery & Beadmaking
- Sculpture
- Picture Making
- Graphic Design
- Textile Design
- Methods of Teaching Visual Art
- Professional Ethics and the Visual Art Practitioner

*Visual Art students are expected to select **Methods of Teaching Visual Art** and **Professional Ethics and the Visual Art Practitioner** as core in addition to two others, (1 each from 2-D and 3-D)*

The PD session check list: supporting B.Ed. implementation.

In some cases, to support implementation the PD sessions may need to add more detail to what is in the course manuals

What to Include in PD sessions: Check list	Checked and In Place.
<p>Course introductions and conclusions</p> <ul style="list-style-type: none"> The first PD session of each semester introduces the course manual/s and course expectations to student teachers. The final PD session provides the opportunity to review student teachers learning from the course 	
<p>Prior knowledge: Points for tutors on assessing or activating student teachers' prior knowledge.</p>	
<p>Basic School Curriculum: when topics for student teachers are from the Basic School Curriculum the PD session makes explicit links.</p>	
<p>CLO: relevant to the session to be introduced</p>	
<p>Lesson Learning outcomes and indicators. PD sessions provide opportunities for tutors to model interactive approaches to teaching and learning they will use to support student teachers</p>	
<p>Integration of subject specific content and subject specific pedagogy. This is modelled in PD sessions through activities for tutors. Any potentially new or challenging concepts are explored with tutors</p>	
<p>Subject Specific Training. Where subjects have been grouped together for the PD sessions, tutors are guided to activities in the subject course manuals to ensure the PD is not generic. Where appropriate there is direct page or point references to activities in each of the relevant subject course manuals.</p>	
<p>Integrating GESI: each PD session explicitly highlights at least two (2) teaching and learning activities from the course manual/s which should be used to promote student teachers' understanding of GESI responsiveness and support the inclusion of all pupils.</p>	
<p>Assessment. Integrating and embedding NTEAP practices PD sessions include at least two continuous assessment opportunities which will support tutors in developing student teacher's understanding of and ability to apply assessment for or as learning.</p>	
<p>Phase Specific Training. Tutors are guided to specific activities in the relevant phase course manuals for Early Grade (EG), Upper Primary (UP) and Junior High School (JHS). Tutors are advised to group student teachers according to the phase they are training for specific activities.</p>	
<p>Building in STS. STS tasks are integrated into the PD sessions. Preparing for work in school and opportunities for tutors to draw on what student teachers are learning in school, for example, targeting observations linked directly to the themes in the course manuals.</p>	
<p>Building in activities which support the development of 21stc skills in particular the use of ICT. The development of these is integrated into the PD sessions including the use of ICT to support learning. Each PD session should include at least two (2) examples of students being required to use ICT to extend their learning.</p>	

Resources /TLM. Where specific resources are required, it is clear where tutors can access them e.g., videos, online resources or readings.

- Identify officer(s)/resource person(s) that will be the in-house tour guide at the site.
- Discuss the outline of the lesson with him/her indicating exactly what you expect your students to learn.
- Prepare your students (tell them the kind of preparation they need in terms of dressing, materials they must carry or not carry, etc. Tell them the nature of the site and possible risks in the place; what they should expect and look out for, any internal and external provision made for them. Tell them of time of departure to and from the College, etc.
- Take or check attendance before departure to authenticate the student teachers on board.
- At the site do the following:
 - . Take attendance again and be sure all student teachers with whom you left college have arrived safely on site.
 - i. Be at hand to emphasize salient points raised by your on-site guide
 - ii. Prompt your student on relevant things to note/pictures to take /questions to ask, etc.
 - iii. At the end of the tour review what was taught and put all information into the right perspective
 - iv. Take attendance to be sure every student teacher is on board before you take off back home
- Back at College do the following:
 - i. Check attendance again to be sure all your team members are back safely with you to College.
 - ii. Review the trip with students
 - iii. Let students write reports on the trip

The PD session check list: supporting B.Ed. implementation.

In some cases, to support implementation the PD sessions may need to add more detail to what is in the course manuals

What to Include in PD sessions: Check list	Checked and In Place.
<p>Course introductions and conclusions</p> <ul style="list-style-type: none"> • The first PD session of each semester introduces the course manual/s and course expectations to student teachers. • The final PD session provides the opportunity to review student teachers learning from the course 	
<p>Prior knowledge: Points for tutors on assessing or activating student teachers' prior knowledge.</p>	
<p>Basic School Curriculum: when topics for student teachers are from the Basic School Curriculum the PD session makes explicit links.</p>	
<p>CLO: relevant to the session to be introduced</p>	
<p>Lesson Learning outcomes and indicators. PD sessions provide opportunities for tutors to model interactive approaches to teaching and learning they will use to support student teachers</p>	
<p>Integration of subject specific content and subject specific pedagogy. This is modelled in PD sessions through activities for tutors. Any potentially new or challenging concepts are explored with tutors</p>	
<p>Subject Specific Training. Where subjects have been grouped together for the PD sessions, tutors are guided to activities in the subject course manuals to ensure the PD is not generic. Where appropriate there is direct page or point references to activities in each of the relevant subject course manuals.</p>	
<p>Integrating GESI: each PD session explicitly highlights at least two (2) teaching and learning activities from the course manual/s which should be used to promote student teachers' understanding of GESI responsiveness and support the inclusion of all pupils.</p>	
<p>Assessment. Integrating and embedding NTEAP practices PD sessions include at least two continuous assessment opportunities which will support tutors in developing student teacher's understanding of and ability to apply assessment for or as learning.</p>	
<p>Phase Specific Training. Tutors are guided to specific activities in the relevant phase course manuals for Early Grade (EG), Upper Primary (UP) and Junior High School (JHS). Tutors are advised to group student teachers according to the phase they are training for specific activities.</p>	
<p>Building in STS. STS tasks are integrated into the PD sessions. Preparing for work in school and opportunities for tutors to draw on what student teachers are learning in school, for example, targeting observations linked directly to the themes in the course manuals.</p>	
<p>Building in activities which support the development of 21stc skills in particular the use of ICT. The development of these is integrated into the PD sessions including the use of ICT to support learning. Each PD session should include at least two (2) examples of students being required to use ICT to extend their learning.</p>	

Resources /TLM. Where specific resources are required, it is clear where tutors can access them e.g., videos, online resources or readings.
